PROJECT PROFILE

DDO IFCT IDENTIFICATION		
PROJECT IDENTIFICATION		Drainet tune
Project Name:	, buo a din a	Project type
Development of short-term livestock	breeding	Recovery/Social sector resilience
Code PAPP : 3	locale and due o	Recovery/Economic sector resilience
Project owner: Ministry of Animal Husbandry Capacity building and Governance.		
Estimated cost (USD): 1.680.000		
Amount acquired (USD):	🖂	
Level of preparation : Detailed draft	_	
Feasibility study :		
PPRESENTATION OF THE PROJECT		
Objectives and description Contribute to food and nutrition security; Increase the level of animal production in the areas affected by the Thele disease.		
- Increase the level of animal production in the areas affected by the Ebola disease.		
Presentation of project components		
 Increasing the supply of inputs and farming equipment (feed, drugs, small equipment): support the establishment of cereal stocks and feed concentrates(premix, meal, fish meal) and equipment for improved livestock; Intensification of production systems: supply farms cores of small ruminants, poultry, pigs, rabbits and cane rats; establish demonstration workshops for small ruminants fattening; train livestock graziers and poultry farms supervisors; popularize improved habitat models (sheep barns, chicken coops, rabbit hutches, cane rat pens?) in traditional breeding; establish rabbit multiplication and dissemination farms; Implementation of research programs and the transfer of innovations to the relevant sectors: conduct research, including the study of breeding systems and reproductive performance, increased productivity, nutritive analysis the formulation of economical grass-fat rations. Expeted results, effects/impacts The national production of short-cycle livestock industries (meat and eggs) is increased and contributes to cover the bulk of the population's consumption needs; The consumption of bush meat has declined in favor of safe domestic meats, free of major health risks; The productivity of local breeds has increased; 		
- Breeders of the sectors concerned have access to reliable credit facilities adapted to their needs;		
- Partnerships are established between the research department and the farming sector to facilitate		
the ownership of research results and innovations.
